

Tradeworks Newsletter of June 2014

Message from Renate

Hello, I hope this newsletter finds you in good health? I have a story I would like to share with you ... I had a gentleman call me the other day a bit concerned because he could not get out of his house.

The front door was jammed shut & he was not strong enough to wrench it open. The back door also had a problem which eludes me now but the upshot of this was if he needed to go out he was unable to.

We are going into the wet weather now and what I am finding is that customers are calling us because they have jammed doors or their doors are sticking.

Changes in weather can affect houses because of expansion and contraction. This can be from too much moisture too much heat ... and so on.

If your door is jammed or sticking you will probably need a bit shaved off the top or bottom or off the sides. It requires a bit of patience and accuracy. If you are having such a problem give us call.

All the best,
Renate

Beautiful Bathrooms

Success Story

The bathroom and toilet in our house were an embarrassment. We like to have friends over and share a nice meal together and it was getting so we didn't want our friends to come over because we were so embarrassed every time they asked to use the bathroom. It was a project that we were putting off because it seemed like such a daunting task.

Tradeworks renovated our bathroom & I have to say it was not an upsetting experience – not one little bit. Everything was done when we were told it would be done & the result is just fabulous. Thanks once again.

M.W. Lyons

Bathrooms are our Specialty!

Tradeworks has been creating Beautiful Bathrooms for over 23 years. We go the extra mile to fulfil your ideas and visions. If you want a team that will actually give you what you want Tradeworks is the team for you. PH: 62 300 500

We will send you a specialist to examine your bathroom and discuss exactly what you want for the best price possible.

Design your new bathroom to your taste, YOUR ideas & dreams. OUR Craftsmanship.

Renate's Tips

I am going to give you a few tips today on doing up an investment house cheaply and how I get maximum bang for my buck.

If you don't have several thousand dollars up your sleeve and the skill to install a flat pack kitchen I have another solution for you.

There is a laminate paint that is available to paint over laminate surfaces. The surface has to be in good shape though. Take off all the handles on the cupboards and drawers and unless they are new... throw them out ... they date your kitchen. Go out and buy some new ones at a hardware store.

Wash the surfaces with a good detergent or sugar soap as instructed. Put on the laminate primer and away you go.

You can pick just about any paint colour ... put on the recommended number of coats. Apply your new handles after the paint has had a day or two to dry and you will have a new kitchen that you can be very pleased with.

Tradeworks Hours

Monday – Friday 9:30 - 5pm

After hours the phones are diverted to a mobile number.

If no one answers your call the operator is probably on another call so leave a message and we will call you back soon after.
